

The "GOD PARTICLES 'n US" TM project has one primary goal: to activate a unified global centering cosmology that is incontrovertibly shared by all life. The journey to find that crossing will be an internal visionary experience. The vehicle is your heart; you are already carrying the necessary hardware (so to speak) on your DNA. The project will give you the software (so to speak) to activate your system. You will find yourself at a revolutionary intersection of science, art, and spirit.

The "GOD PARTICLES 'n US" TM project offers unfettered opportunity. Participating in a solid finite body, possibly for the first time, you will find the infinite universe located in yourself, your unique place within this expanse of time, and your absolute connection to all things. You will recognize the "Holographic Heart of the World" within yourself. The "Holographic Heart of the World" is, and will be for you, a world of beauty, healing, and connection to others, not a frightening void of emptiness.

The project is in several forms at this point in time. It is here now on shutterfly as an introduction to the upcoming e-book. Combined with this page is a step-by-step primer published online as an on-going article series. See "The New Era Times" magazine, author, Jennet Inglis.

This shutterfly page is broken down into component parts of the story of the life-cycle of the Supernova 1987a. This stellar event is the heart of our story and our creation of a new cosmology. This life-cycle is shown to you via a selection of the paintings you see here in the section titled: "Birth of SN87a". The next section called "Particles" introduces the sub-atomic "GOD PARTICLES" within you. The "Phenomena" section shows a few of the various ways the sub-atomic particles activated genetic material here on earth. "The Bridge" section brings you closer to the goal. "Emerging Cosmology" shows the seeds of the new world within you, and the following section titled "Holographic Heart of the World" brings you to rest at an intersection.

Step by step unfolding in the articles series, and here on this page, the "GOD PARTICLES 'n US" project reveals the fertile byways connecting the worlds of sub-atomic particles, the neuro-physics of the human heart, the holographic world of Supernova 1987A, and the unfolding of the Mayan Prophecy, among many.

As the miraculous and still unexplained science of the Supernova 1987a and the visionary work of Jennet Inglis coalesce, a universal cosmology is born within you, the viewer. Our new "GOD PARTICLES 'n US" TM cosmology continues its journey around the world, connecting each new viewer to the "Holographic Heart of the World".
