

PITCH POINTS for the Physical Grand Installation of:

GOD PARTICLES 'n US: Finding the Holographic Heart of the World

- You, the viewer, in a solid finite body, walking through the hall will experience, possibly for the first time, the “Infinite Universe” located in yourself, your unique place in this “Infinite Universe”, and your absolute connection to all things in that “Infinite Universe”.
- You learn what God Particles are on the 2-D walls as the science of the Supernova 1987a is explained and shown to you via paintings; you are connected to the 3-D “Infinite Universe” in your physical body via the mandala of monumental canvases; and finally in the geodesic dome you discover your absolute 4-D connection to and place in the “Holographic Heart of the World”.
